

Earth Sciences 3341B – Waters and Geochemical Cycles - January-April 2014

Where: Tuesday 10:30-11:30 Biology and Geology Building 1053
Thursday 10:30-11:30 Biology and Geology Building 1053

Instructor: Dr. Patricia Corcoran, pcorcor@uwo.ca, 519-661-2111 x 86836
Office hours by appointment; BGS 0164

Grading:

Mid-term test: 25%
Final examination: 35%
Major Assignment 20%
Problem sets 20% (weekly tutorials)
Participation in tutorials is required

Important dates: Mid-term test: **Thursday February 27, 2014**
Major Assignment: **Thursday March 20, 2014**
Final exam date will be set by the Registrar's office

Course Objectives:

Develop a working vocabulary of geochemical terms so that in future industry and research situations, you will be able to communicate effectively.

Demonstrate how water obtains its chemical composition in natural environments

Understand how geochemical processes modify water compositions

Online Material: Online material for this course including hand-outs, some reading material and discussions may be accessed through the OWL SAKAI program (<https://owl.uwo.ca/portal>).

Recommended (not required) Text: (ES3341B Reserve Lists @ Taylor Library):

Berner, E.K. & Berner, R.A. (1996) *Global Environment: Water, Air and Geochemical Cycles*. Prentice-Hall. ISBN 0-13-301169-0

Other Useful Resources

Drever, J.I. (1997) *The Geochemistry of Natural Waters, Surface and Groundwater Environments*. Prentice-Hall. ISBN 0-13-351396-3

Eby, N. (2004) *Principles of Environmental Geochemistry*. Thompson Nelson. ISBN 0122290615

Prerequisites: Earth Sciences 2230a/b or Chemistry 1301a/b or the former Chemistry 1100a/b or the former Chemistry 1050, 1020, or permission of the department.

It is the student's responsibility to ensure that course prerequisites have been completed successfully. Unless you have either the requisites for this course or written special permission from your Dean to enroll in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

Academic offences:

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, at the following Web site:

<http://www.uwo.ca/univsec/handbook/appeals/scholoff.pdf>

Plagiarism is a serious academic offence. The UWO Senate Academic Handbook defines plagiarism as "The act of appropriating the literary composition of another, or parts or passages of his writings, or the ideas or language of the same, and passing them off as the product of one's own mind." Students must write their assignments in their own words. Whenever students take an idea, or a passage from another author, they must acknowledge their debt both by using proper referencing such as citations. For more information see Scholastic Offence Policy in the Western Academic Calendar.

All required papers will be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (<http://www.turnitin.com>).

Student's responsibilities in the event of a medical issue:

If you are unable to meet a course requirement due to illness or other serious circumstances, you must provide valid medical or other supporting documentation to the Dean's office as soon as possible and contact your instructor immediately. It is the student's responsibility to make alternative arrangements with their instructor once the accommodation has been approved and the instructor has been informed. In the event of a missed final exam, a "Recommendation of Special Examination" form must be obtained from the Dean's Office immediately. For further information please see:

http://www.uwo.ca/univsec/handbook/appeals/accommodation_medical.pdf

A student requiring academic accommodation due to illness, should use the Student Medical Certificate when visiting an off-campus medical facility or request a Records Release Form (located in the Dean's Office) for visits to Student Health Services. The form can be found here:

<http://www.uwo.ca/univsec/handbook/appeals/medicalform.pdf>

Accessibility Statement

Please contact the course instructor if you require material in an alternate format or if you require any other arrangements to make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 661-2111 x.82147 for any specific question regarding an accommodation.

Course Outline:

1. Origin and Geochemical properties of major subdivisions of earth
 - a. Mineral chemistry

2. Rainwater composition and Processes affecting composition

- a. Acquisition/removal of solutes and aerosols over oceans and continents
- b. Natural and anthropogenic sources of acids and pH of rain water

3. Processes affecting soil water and surface water compositions

- a. Soil development and the role of acids
- b. Acquisition of solutes by chemical weathering processes

4. Processes affecting ground water compositions

- a. Solute acquisition and removal from Groundwater
- b. Metal mobility
- c. Saline ground water geochemistry

5. Processes affecting the composition of seawater

- a. Acquisition and removal of solutes and the salinity of seawater
- b. Seawater interactions with sediments
- c. Submarine hydrothermal processes
