**On Cover** – Dr. Cheryl Forchuk in front of CanVoice, a London consumer survivor organization that helps people facing the challenges of mental illness by providing housing, much-needed support systems, and a sense of community. Dr. Forchuk and CanVoice have partnered on a number of research and leadership activities that have been instrumental in their mutual success.

Dr. Forchuk's research focuses on issues related to community integration for people who have been diagnosed with a mental illness including therapeutic relationships, social support and housing.

## 2007/08 FACULTY OF HEALTH SCIENCES LEADERSHIP TEAM

**Dr. W. James Weese**, Dean

**Dr. Kevin Wamsley**, Associate Dean (Programs)

**Dr. Linda Miller**, Associate Dean (Scholarship)

**Dr. Chris Lee**, Acting Director, BHSc Program

**Dr. J.B. Orange**, Director, School of Communication Sciences and Disorders

**Dr. Earl Noble**, Director, School of Kinesiology

**Dr. Mary-Anne Andrusyszyn**, Director, School of Nursing

**Dr. Angela Mandich**, Director, School of Occupational Therapy

**Dr. Jayne Garland**, Director, School of Physical Therapy

**Dr. Jan Polgar**, Chair, Graduate Program in Health and Rehabilitation Sciences

## ABOUT THE FACULTY

The Faculty of Health Sciences was established in 1997 when the Faculties of Nursing, Kinesiology and Applied Health Sciences merged to become one strong Faculty of Health Sciences. The result was a dynamic and exciting new Faculty comprised of five Schools and three interdisciplinary programs. The Faculty includes five schools: Kinesiology, Nursing, Occupational Therapy, Communications Sciences and Disorders (Audiology, Speech-Language Pathology), and Physical Therapy, as well as two programs: the Bachelor of Health Sciences (BHSc), and the graduate program in Health & Rehabilitation Sciences.

Our mission is *"to lead in the generation and dissemination of knowledge in the areas of health and health care, rehabilitation, physical activity and sport."* We are also committed to offering the best student experience among Canada's leading research intensive universities.

## STATISTICS

2,983	Undergraduate students
601	Graduate students
124	Full-time faculty members
57	Graduate and undergraduate degrees, modules, diplomas and certificates

## ACTIVITY-BASED PROGRAMS

Western Sports & Recreation Services

- Mustang Athletics
- Campus Recreation

## RESEARCH CENTRES

- National Centre for Audiology
- Canadian Centre for Activity and Aging
- International Centre for Olympic Studies

## SCHOOLS

- Communication Sciences and Disorders
- Kinesiology
- Nursing
- Occupational Therapy
- Physical Therapy

## INTERDISCIPLINARY PROGRAMS

- Bachelor of Health Sciences (Undergraduate Program)
- Health & Rehabilitation Sciences (Graduate Program)

# THE DEAN'S MESSAGE

I present the 2007-2008 Faculty of Health Sciences' Scholarship Report with pride and pleasure. Like the previous editions, this Report chronicles the research activity in the Faculty over the past year and speaks to the heightened success of our researchers. Congratulations and thanks to all involved.

Our academic programs remain fiercely competitive and are attracting the best and brightest students. Many of our students hold prestigious provincial and national scholarships. Our interdisciplinary graduate program has been very popular to prospective students and is proving to be a further catalyst to greater interdisciplinary research activity. We are also making monumental strides in disciplinary research activities. It is a great time to be in the Faculty of Health Sciences.

We are attracting outstanding professors and staff members to compliment a strong cohort. Our newest building, the Arthur and Sonia Labatt Health Sciences Building, is providing us with state-of-the-art teaching and research facilities that are taking the Faculty to new heights. Our simulated hospital ward and simulated home care unit, coupled with our 3D theatre, are only examples of the advanced teaching and learning environments that we offer our students, professors and staff members.

Our researchers are competing favourably for research funds from SSHRC, NSERC, CIHR and CFI. We are also securing research funding from private funding agencies like the Heart and Stroke Foundation, the Alzheimer Society of Canada, the Hearing Foundation of Canada, the Worker Safety and Insurance Board, and AUTO21 to name a few. Our members are winning the most prestigious research awards the University offers (e.g., Distinguished University Professor, Faculty Scholar, Early Researcher Awards). My sincere congratulations to our recipients.

This is an exciting time for health sciences education and research. This document helps illustrate how the Faculty of Health Sciences is at the forefront of innovation into research and education in the health sciences and is committed to providing the best student experience among Canada's leading research intensive universities.

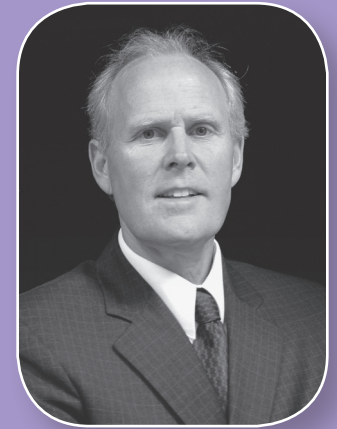

Special thanks to Dr. Tony Vandervoort, Acting Associate Dean – Scholarship and Dr. Gordon MacDonald, our Faculty of Health Sciences Research Officer for their work in facilitating and advancing our research activity in the Faculty. I would also like to acknowledge the work of Susan Stewart and Matt Quin for their work in compiling this information. Thanks as well to our Research Mentors for their contributions in reviewing grants for the Faculty and encouraging our research community. Your efforts are making a difference as evidenced by the success rate of our researchers in comparison to national averages. Sincere thanks also goes to the School/Program Directors for their focused and inspired leadership in their units and within the Faculty. I also acknowledge their efforts in confirming the data contained in this report. Finally, and most of all, I would like to thank the professors, staff and students in the Faculty for their committed efforts in advancing research activity within the Faculty.

We're proud of our accomplishments to date, and even more excited about our prospects for the future.

Yours in Health Sciences,

**W. James Weese, Dean**

# ASSOCIATE DEAN'S MESSAGE

“The Faculty of Health Sciences continues to be a national and international leader in health research.”

Tony Vandervoort,  
Acting Associate Dean -  
Scholarship

I am very pleased to be able to share the following report of our 2007-2008 research achievements with our colleagues and the broader University community.

The information on the following pages shows again this year that the Faculty of Health Sciences continues to be a national and international leader in health research. I extend much gratitude to Dr. Gord MacDonald, FHS Research Officer, for pulling the report together in a clear way that facilitates review of our progress. It is particularly notable that our faculty members have both an impressive record of securing operating funds for their research and local programs, and also continue to make important contributions to large, collaborative and interdisciplinary research projects at the provincial, federal and international level.

While this report is intended to highlight the work and accomplishments of the outstanding researchers in the Faculty of Health Sciences, I also want to acknowledge the tremendous work and commitment of the supportive team within the staff complement of FHS, and also in Western's Research Development & Services unit. Today's health sciences research involves an extensive administrative side, and we offer our sincere thanks to everyone across campus and beyond who help keep it all going as smoothly as possible.

Congratulations to the members of the Faculty of Health Sciences, and all of our valued colleagues and collaborators for their contributions to our ongoing research success!
