**The Role of Diversity and the Perception of Inclusivity in a Neighbourhood**  
This project involves an analysis of diversity in the context of a neighbourhood, examined through various businesses and organizations present. The analysis will address what drew businesses/organizations to their location, whether they feel integrated into the community, and how these businesses/organizations impact public perceptions of diversity and inclusion in Old East Village.

Following from the analysis, a Report, Campaign, and proposed Artwork will reflect the research and serve to assist variously with advocacy, promotion, communication and expression.
