

### Course Introduction and Overview:

This course will give registrants 1) a working knowledge of crystal structure analysis so that they will be able to make an informed reading of crystal structure results they encounter in the chemical literature and 2) provide enough background for those Chemistry Ph.D. students who would like to go on and learn how to collect their own data and solve and refine crystal structures. This course is broken up into 2 components: **CHEM-9541S** (Winter 2026) and **CHEM-9541Q** (Date TBD), which will cover theoretical and practical aspects of X-ray crystallography, respectively.

### Required resources:

**Text:** No textbook is required; notes are to be taken during class and problem sets are to be given out during class.

The following serve as utile resources and can be found in the Taylor library:

Luger, P. "Modern X-ray Analysis in Single Crystals: a practical guide", 2014  
Clegg, W. et al. "Crystal Structure Analysis: Principles and Practice" 2nd ed., 2009  
Massa, W. "Crystal Structure Determination", 2nd ed. 2004  
Giacovazzo, et al. "Fundamentals of Crystallography", 1992

**Course content:** (not all might be covered and this may vary).

Topic 1	What is a crystal and how do you grow them?
Topic 2	Diffractometer, X-rays, Tubes, Optics, Detectors, Goniometers
Topic 3	Bragg's Law, Lattices, Unit Cell, Crystal Systems, Bravais Lattices
Topic 4	Reciprocal Lattice, Miller Indices, Ewald Sphere, Limiting Sphere, Resolution
Topic 5	Symmetry, Asymmetric Unit, Point Groups, Stereographic Projections, Crystal Classes
Topic 6	Translational Symmetry Elements, Space Groups, H-M Notation, International Tables
Topic 7	Systematic Absences in Reciprocal Space
Topic 8	Structure Factors, Scattering Factors, Freidel's Law (absolute configuration)
Topic 9	Fourier Transforms, Electron Density, The Phase Problem

**A friendly reminder:** *It is extremely important, as with any course, to keep up with the required reading. One can become lost very quickly, and the pace of this course, combined with the fact that many of the topics discussed rely heavily on a firm knowledge of the prior materials, will leave you feeling behind and frustrated!*

All course material will be posted to OWL: <http://owl.uwo.ca>. If students need assistance with the course OWL site, they can seek support on the OWL Help page. Alternatively, they can contact the Western Technology Services Helpdesk. They can be contacted by phone at 519-661-3800 or ext. 83800.

**Late Policy for Chem 9541S:** All work is subject to a late policy of 10% per day, including weekends. Work more than three days late will not receive any credit. Late policies will be waived provided students have a valid reason that is supported by the academic counsellors from their home faculty.

**Student Absences:** Students who are unable to meet their academic responsibilities due to medical or compassionate reasons may submit a request for academic consideration. For each missed piece of work, regardless of its weight in the total course grade, you must apply for such consideration by providing valid medical or supporting documentation to the Academic Counselling Office of your Faculty of Registration.

**Accommodation for students with disabilities:** Students with disabilities are encouraged to contact Accessible Education, which provides recommendations for accommodation based on medical documentation or psychological and cognitive testing. In cases where a student misses a piece of work for reasons related to the disability on file with Accessible Education, the student should request accommodation by contacting Accessible Education instead of the Academic Counselling Office

For further information, please consult the University's medical illness policy at  
[https://www.uwo.ca/univsec/pdf/academic\\_policies/appeals/accommodation\\_medical.pdf](https://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_medical.pdf).

The Student Medical Certificate is available at  
[https://www.uwo.ca/univsec/pdf/academic\\_policies/appeals/medicalform.pdf](https://www.uwo.ca/univsec/pdf/academic_policies/appeals/medicalform.pdf).

Students should also note that individual instructors are not permitted to receive documentation directly from a student, whether in support of an application for consideration on medical grounds, or for other reasons. All documentation required for absences that are not covered by the Self-Reported Absence Policy must be submitted to the Academic Counselling office of a student's Home Faculty.

#### **Specific to Chem 9541S:**

**Assignments** – If an assignment is not handed in for a valid reason (see process for seeking academic consideration above) the weighting will be redistributed equally to the other assignments.

**Final Exam** – If you miss the Final Exam, please contact your faculty's Academic Counselling Office as soon as you can do so. They will assess your eligibility to write the Special Exam (the name given by the university to a makeup Final Exam). You may also be eligible to write the Special Exam if you are in a "Multiple Exam Situation" (see [http://www.registrar.uwo.ca/examinations/exam\\_schedule.html](http://www.registrar.uwo.ca/examinations/exam_schedule.html)).

#### **Accommodation and Accessibility:**

#### **Religious Accommodation:**

When a course requirement conflicts with a religious holiday that requires an absence from the University or prohibits certain activities, students should request accommodation for their absence in writing at least two weeks prior to the holiday to the course instructor and/or the Academic Counselling office of their Faculty of Registration. Please consult University's list of recognized religious holidays (updated annually) at:
