The Lazarovits Chair in Immunobiology and Transplantation
Schulich School of Medicine & Dentistry
Western University

Posting Date: April 25, 2023

Position Profile: The Schulich School of Medicine & Dentistry at Western University is seeking to recruit an innovative clinician-scientist with translational research expertise in transplant immunobiology, tissue injury and/or organ regeneration. The position will provide an opportunity for the candidate to take a lead role in Multi Organ Transplant Program research activity including a potential leadership role in the Matthew Mailing Centre for Translational Transplant Studies at London Health Sciences Centre. In addition to research leadership, the successful candidate will be expected to make contributions to the training of undergraduate, graduate, and postgraduate students through teaching, research supervision and mentorship in their subspecialty. The successful candidate will hold a Limited Term Clinical Academic appointment at the rank of Associate Professor, or a Continuing Clinical Academic appointment at the rank of Associate Professor or Professor, depending on qualifications and experience. The successful candidate will be appointed to the department that most appropriately fits their expertise with a potential cross appointment in a relevant basic science department.

Academic and Clinical Expectations: The candidate will have protected research time within the appointed department. Clinicians who have a devoted research commitment and clinical experience in transplant immunobiology, tissue injury and/or organ regeneration are encouraged to apply. Clinical duties and expectations to be determined by the clinical academic department. Applicants must have demonstrated the ability to publish in the highest quality academic and subspecialty outlets and be a recognized expert in their field of research. Clinician-scientist or surgeon-scientist candidates will be expected to provide clinical services in their subspecialty according to the needs of their home department.

Qualifications: The ideal candidate will have an MD or equivalent degree and will hold or be appointed at the rank of Associate or Full Professor with continuing (Clinical Academic) appointment, depending on qualifications and experience. The successful candidate will have completed a residency from the Royal College of Physicians and Surgeons of Canada or equivalent and fellowship training in a field related to transplant immunobiology, tissue injury and/or organ regeneration. The candidate should have or be eligible for registration by the College of Physicians and Surgeons of Ontario and should have or be eligible to attain active hospital privileges at London Health Sciences Centre and/or St. Joseph’s Health Care London.

Compensation Details: The Chair appointment is for a five-year period, with the possibility of renewal for one additional term pending review recommendation. Compensation will be based on qualifications and experience and will be composed primarily of the following sources: fee for service, alternative funding plan and academic support.

The City: London, Ontario is Canada’s 10th largest city with a population of 400,000, a catchment area of 2.4 million, and is situated in southwestern Ontario between Toronto and Detroit. The region has a strong economy and excellent primary and secondary school systems for residents with children. It is a safe and culturally diverse city. With parks, tree-lined streets and bicycle trails, London is known as the “Forest City”. London boasts an international airport, galleries, theatre, music, and sporting events. See www.ledc.com/why-london to learn more.

The University: Western University is a research-intensive university with full-time enrolment of 34,000 students and a full range of academic and professional programs. The Schulich School of Medicine & Dentistry provides an outstanding educational experience within a research-intensive environment where tomorrow's physicians, dentists and health researchers learn to be socially responsible leaders in the advancement of human health.

The successful candidate will have access to research facilities and state-of-the-art instrument cores at Western that have been supported through major recent investments. These facilities and cores include but not limited
to, a new Biomedical Research Facility for animal housing (opens in 2023), a Neurobehavioral Core, a Western Advanced Microscopy Core, a Centre for Functional and Metabolic Mapping that includes 3T up to ultra-high field MRI imaging, and a new containment level 3 facility for imaging pathogens for knowledge translation.

With roots going back a century and a half, London Health Sciences Centre (LHSC) is one of Canada's largest research-intensive acute tertiary and quaternary care teaching hospitals. LHSC is one of the leading transplant programs in Canada, performing 200 transplants annually. More than 6,000 Canadians have received transplants in London, including kidney, liver, heart, kidney-pancreas, and pancreas. It is one of two multi-organ transplant programs in Ontario. Attracting top clinicians and researchers from around the globe, we excel in specialized care programs and services. As leaders in innovation and health system transformation, we advance health care for patients in Ontario, our nation, and the world.

To apply: Applications will be accepted until the position is filled. Review of applications will begin after August 1, 2023, with an anticipated start date of January 1, 2024, or as negotiated. Interested candidates should send a letter of interest providing details on the candidate’s current and proposed research program and statement of academic qualifications; curriculum vitae; the names and addresses of three references; and also complete, sign and include the form at the following link: http://uwo.ca/facultyrelations/physicians/Application_FullTime_Clinical.pdf to:
