

Together — we're — **AMPing DOWN**

'Watt' have we done?

Western University is invested in creating greater efficiencies on campus. As part of ongoing enhancements, Facilities Management has installed more efficient chillers (used for cooling buildings), shut down non-essential systems during evenings and weekends, and installed occupancy sensors and LED lighting throughout campus.

'Watt' can you do?

Turn off computers at the end of the day

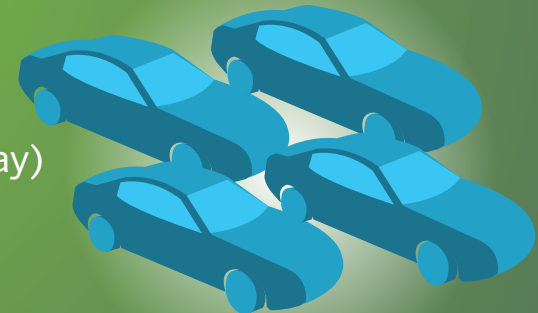

Savings: 60,000 kwh/year

Equivalent to the power used by two average Canadian homes for a year.

Turn your lights out

Savings: 86,000 kwh (2 hrs each day)

Equivalent to removing 11 cars from the road for a year

Unplug printers when not in use

Savings: 91,000 kwh/year

Equivalent to planting 48,294 trees
