Course Requirements

During their first year, students are required to complete 6 half-credit courses in which they must achieve an overall average of at least 75% to maintain minimal good standing, at least one in each of three of the areas below. For students who lack demonstrable competence in the History of Philosophy, one of these areas must be History of Philosophy. This will be determined at a meeting with the graduate chair at the beginning of term. During their second year, students are required to complete 5 half-credit courses in which they must achieve an overall average of at least 75% to maintain minimal good standing, at least one in each of three of the areas below.

| Area | Completed | Not Completed Provide course number |
|--|---|--|
| History of Philosophy | <input type="checkbox"/> 9127A: ARISTOTLE'S LEGAL THEORY (Klimchuk) <input type="checkbox"/> 9040B: RACE AND PHILOSOPHY IN THE 18 TH CENTURY (Dyck) <input type="checkbox"/> 9212B: PHILOSOPHICAL FOUNDATIONS OF MODERN PHYSICS (DiSalle) | <input type="checkbox"/> Student requesting Graduate Chair support |
| Moral, Political, & Legal Philosophy | <input type="checkbox"/> 9127A: ARISTOTLE'S LEGAL THEORY (Klimchuk) <input type="checkbox"/> 9119A: HUMAN RIGHTS (Jones) <input type="checkbox"/> 9123B: TOLERATION (Vernon) <input type="checkbox"/> 9121B: GLOBAL JUSTICE (Vernon) | <input type="checkbox"/> Student requesting Graduate Chair support |
| Mind and Language | <input type="checkbox"/> 9802A: TOPICS IN THE PHILOSOPHY OF EMOTION (Charland) <input type="checkbox"/> 9615A: MERLEAU-PONTY'S PHENOMENOLOGY OF PERCEPTION (Fielding) <input type="checkbox"/> 9608A: CONSCIOUSNESS (Viger) <input type="checkbox"/> 9230B: ISSUES IN PHILOSOPHY, PSYCHOLOGY & NEUROSCIENCE (Anderson & Kohler) <input type="checkbox"/> 9400L: SURVEY OF PHILOSOPHY OF LANGUAGE (Stainton) – <i>Summer</i> | <input type="checkbox"/> Student requesting Graduate Chair support |
| Philosophy of Science / Logic & Foundations of Mathematics | <input type="checkbox"/> 9245A: SURVEY OF PHILOSOPHY OF SCIENCE (Myrvold) <input type="checkbox"/> 9234B: ETHICAL & SOCIETAL IMPLICATIONS OF AI (Chomanski & Katchabaw) <input type="checkbox"/> 9212B: PHILOSOPHICAL FOUNDATIONS OF MODERN PHYSICS (DiSalle) <input type="checkbox"/> 9225B: SCIENTIFIC REALISM (Psillos) | <input type="checkbox"/> Student requesting Graduate Chair support |
| Feminist Philosophy | - | - |
| Reading Courses & Courses Outside the Department | <input type="checkbox"/> <input type="checkbox"/> | <input type="checkbox"/> Student requesting Graduate Chair support |

Logic Competence Requirement

All students must demonstrate competence in this area and should aim to do in their first year. This requirement can be met, in the first instance, by writing an examination upon entering the program (typically in September). Students who do not wish to do this, or who fail an initial sitting of this examination, will have the opportunity to strengthen their background as needed and write the examination later in their first year. The examination is written, and is administered by the Logic and Foundations of Mathematics Area Committee. Examples of previous examinations are available from the Graduate Program Assistant.

Another option for meeting the logic competency requirement is to attend a specified honours undergraduate course in logic and pass the required course examinations with a strong mark.

Students will receive an exemption from the logic requirement if they can prove to the Chair of the Logic and Foundations of Mathematics Area Committee that they have obtained an "A" grade in a logic course that deals with the topics covered in the exam. These topics coincide with the contents of The Logic Book by M. Bergmann, J. Moor and J. Nelson.
