**Winter Term

Office Hours: By appointment

DESCRIPTION

Ethical issues in health care represent some of the most pressing issues faced by Canadians. In this course, students will learn about the most important bioethical issues across the human life span, from conception to death. At what point in development do human beings acquire moral status? Is it ethical to select human embryos for desirable features? When patients and physicians disagree about treatment, who has the final say? What do we owe the global poor? And can we harvest organs for transplantation from the dead? Diverse philosophical approaches to these—and other—bioethical problems will be considered with an emphasis on the role of moral reasoning. Readings and in-class lectures will be supplemented with discussion of real-world bioethics cases. The course is recommended for students considering a career in the health professions, or those who seek a deeper understanding of contemporary social issues. No prior background in philosophy is assumed.
