Philosophy 1130F: Big Ideas

**Fall 2023
2 hours lecture, plus 1 hour tutorial**

Instructor: N/A

DESCRIPTION

This course will discuss some of the ideas that have shaped modern culture, politics, science, and philosophy. These “big ideas” are familiar and widely debated in our culture. What we often miss is how closely they are connected with philosophy. Many of the most powerful and influential ideas-- not only in philosophy, politics, and culture, but even in science and technology--developed through philosophical reflections on human problems. Historic figures such as Albert Einstein, Martin Luther King, Alan Turing, as well as many of the transformative thinkers of our own time, began by asking new philosophical questions about old and established beliefs. Reading and discussing original texts by these and other authors, we will try to understand some of the most revolutionary and interesting of these ideas from a critical philosophical perspective. We will talk about the impact that they have had, might have, or should have on our lives and thought. “Big ideas” to be discussed include: justice, equality, evolution, infinity, determinism, materialism, computation, artificial intelligence, theism, atheism, skepticism, certainty, evil, relativity, and others.
